

NITIN BHATTI

Data Analyst | BI Developer

+1 (437) 322-7506 | nitinbhatti1907@gmail.com | <https://www.linkedin.com/in/bhattinitin/> | [Portfolio](#) | [GitHub](#) | [LeetCode](#)

PROFILE SUMMARY

Canada-based Data Analyst / BI Developer with **2.5+ years** delivering production analytics across **fintech, insurance underwriting, and Northern Ontario community data** - end-to-end from messy ingestion to KPI dashboards non-technical teams actually rely on. Currently at **NORDIK Institute** on DataNorth while finishing **M.Sc. Computer Science (GPA 3.7/4.0)** at Algoma University.

SKILLS

Languages: SQL | Python | DAX | M (Power Query)

BI & Visualization: Power BI | Tableau | Metabase | SSRS | KPI Reporting | Dashboard Development | Data Storytelling

Power BI Development: Power BI Service | Semantic Models | Data Modeling | Row-Level Security (RLS)

Data Analytics: Data Cleaning | Data Validation | EDA | Statistical Analysis | A/B Testing | Hypothesis Testing

Databases & Data Platforms: SQL Server | PostgreSQL | Azure SQL | Snowflake | Microsoft Fabric | Query Optimization

ETL & Modeling: ETL/ELT | SSIS | Azure Data Factory | Star Schema (Kimball) | Data Transformation

Tools/Cloud: Excel | Google Sheets | Git/GitHub | Azure | AWS | Jira | Agile/Scrum | Stakeholder Communication

PROFESSIONAL EXPERIENCE

Data Analyst Intern

April 2026 - Present

NORDIK Institute (DataNorth Project)

Ontario, Canada

- Consolidated **30+ regional datasets** across **9 thematic areas** for Northern Ontario, cutting format inconsistencies by **~25%** via Excel, Google Sheets, and Power Query (M) ingestion templates.
- Defined **25+ KPI groupings** and **chart-ready datasets** for the **DATANORTH platform** by partnering with researchers, community orgs, and municipal stakeholders to translate reporting needs into measurable indicators.
- Reconciled **100+ source files** via structured validation (null, schema, value-range checks) and documented **40+ data definitions**, eliminating recurring data-quality escalations.
- Built a **PostgreSQL query layer** (CTEs, aggregation views) over **9 thematic data marts**, letting **Power BI and Tableau** users retrieve indicators in **under 2 seconds** and cutting Excel re-pivoting by **~30%**.
- Designed a **star-schema dimensional model** with **15+ conformed dimensions** across 9 subject areas, enabling **RLS-ready** access, data storytelling, and self-serve BI for **3+ stakeholder groups**.

Data Analyst

May 2024 - August 2025

TechAnek Technologies

Gujarat, India

- Slashed reporting cycle time by **40%** and data inconsistencies by **20%** across **5+ insurance underwriting teams** by rebuilding the **Power BI semantic layer** and shipping **12+ Power BI/Metabase dashboards** on **50,000+ records**.
- Eliminated **6+ hours/week of manual analyst work** by designing **Python + SQL ETL/ELT pipelines** (Pandas, dedup, null-handling, scheduled refreshes) orchestrated through **Azure Data Factory**.
- Maintained **sub-3-second dashboard load times** at scale by tuning **MySQL and PostgreSQL queries** (CTEs, indexed joins, window functions) and refactoring the data model across underwriting risk views.
- Modeled the underwriting analytics layer using a **star schema** and ran **statistical analysis, A/B testing, and hypothesis testing** on premium-vs-claim cohorts to support risk-tier decisions for **3+ product lines**.

Machine Learning, Deep Learning & IoT Trainee

January 2024 - April 2024

SAP India

Gujarat, India

- Improved training-data readiness on a **1,000+ image dataset** by building a standardized **Python + OpenCV preprocessing pipeline** with **Pandas/NumPy validation steps** (schema, null, dedup checks).
- Shortened mentor team review-cycle turnaround by **~30%** through reusable **EDA scripts** (class-distribution stats, feature summaries, outlier checks via statistical analysis) and templated output reports.

Junior Data Analyst

July 2023 - December 2023

TechAnek Technologies

Gujarat, India

- Reduced month-end reporting rework by **~30%** by rebuilding the **Power BI model** with **20+ DAX measures** and **5+ Tableau workbooks** on **SQL views** (CTEs, joins), hardened with **Pandas validation, Git/GitHub, and Agile/Jira**.

KEY PROJECTS

DataNorth ([Source Code](#)) ([Live](#))

Apache ECharts, BI Dashboards, Data Modeling, KPI Reporting

- Built **DataNorth with NORDIK Institute** – a Northern Ontario public data platform exposing **13 indicators** across **10 categories** and **6 communities**, with interactive ECharts dashboards, URL-synced geography/year filters, and methodology-tagged CSV/Excel exports backed by real **Statistics Canada** datasets.

Canadian Superstore Analytics Hub ([Source Code](#)) ([Live](#))

Python, Pandas, FastAPI, RFM, Market Basket Analysis

- Shipped a **sales analytics dashboard** on **~10K orders** with **8 cross-filter dimensions** and **10 Pandas/FastAPI analytical endpoints** – KPI summary, monthly trends, **RFM customer segmentation**, market-basket affinity, and discount-bin profitability.

Sault Ste. Marie Climate Trends Dashboard ([Source Code](#)) ([Live](#))

Tableau, Time-Series Analysis, Forecasting

- Built a **Tableau dashboard** on **33 years (1990–2023)** of **CanDCS-M6 climate data** from **climatedata.ca** with date-hierarchy drilldowns, parameter-driven filters, and forecasting views for fast **YoY/MoM trend analysis** across multiple SSM locations.

EDUCATION

M.Sc. Computer Science, Algoma University | **GPA: 3.7/4.0**

September 2025 - August 2026

B.E. Computer Engineering, Gujarat Technological University | **GPA: 3.9/4.0**

October 2020 - July 2024
